DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

- Use single quotes instead of double quotes. I like this rule because it helps to keep the code consistent and easy to read. Plus, it's the default style for most code editors, so it's easier to follow.
- Use spaces around operators. This rule makes the code easier to read by providing visual cues for where one expression ends and another begins.
- Use spaces around parentheses. This rule also makes the code easier to read by providing visual cues for where a function call begins and ends.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

- Use no more than two levels of nesting. This rule can be tricky to follow because it can be hard to know when to break up nested code into separate functions.
- Use four spaces for indentation. This rule is hard to follow because different people have different preferences for how many spaces to use for indentation.
- Place else statements on the same line as the if statement. This rule can be confusing because it goes against the standard practice of putting else statements on a separate line.
